

As It Is Written - Chapter 7

The Triad Structure

An Explanation of the Triad Structure

1. The triad structure is the f_____ of the framework hypothesis. The first triad is days o_____ - t_____, and the second triad is days f_____ - s_____.
2. Days one and four, days two and five, and days three and six p_____ and r_____ one another.
3. The parallelism between the first three and the last three days indicates a t_____, not a c_____, arrangement of the c_____ account.
4. There are v_____ in the triad schemes of various framework advocates.

The Majority Report's Triad

DOMAINS	RULERS
Day 1 Light	Day 4 Luminaries
Day 2 Sky Seas	Day 5 Sea creatures Winged Creatures
Day 3 Dry Land Day 3b Vegetation	Day 6 Land Animals Day 6b Man
THE RULER OF ALL Day 7 Sabbath	

Three Initial Responses

1. We admit there is a “g_____ symmetry and a s_____ parallelism.”
2. Parallelism does not require d_____ (Consider Matthew 1:17 and parallel events in Abraham’s and Isaac’s lives).

3. B_____ and sea c_____ are not called upon to rule. Ruling over creation is A_____ job. When an animal seeks to take d_____, the fall occurs.

Time for a Group Project

Let us list on the board what was made on each day of creation. When we compare our list with the triad scheme, we see the following problems with the framework hypothesis.

1. If w_____ was created on day one, it had no “ruler” on day f_____.
2. S_____ belong in day three not day t_____.
3. B_____ “multiply on the earth” on day five but there is no earth to multiply upon on day t_____ (dry land is on day three).
4. It is difficult to see the p_____ between vegetation and m_____.
